

CROSS APT is an universal **automatic payment terminal** that can be used for cash or credit card payment when receiving and issuing various tickets.

Integral part of the CROSS APT offer to our customers are broad screen customization options. Colors, backgrounds, logos, photos, language versions and specific tailor-made functions can be added to the large touchscreen. It is also ready to run photo slide show or video presentations during idle time of the payment terminal.

Pay station CROSS APT is used in a wide variety of applications:

- Parking
- Aqua parks
- Sport and cultural events and facilities
- Public transport
- and many others

The main advantage lies in its fully open interface that allows integration with any third-party software, including 100% customization of graphical user interface on the touch screen. Also the hardware of the terminal can be adapted to customer's needs, for example using a variety of special ticket printers and different ticket materials and coatings.

KEY BENEFITS:

- OEM version – possibility to integrate any third-party software
- Large options for hardware and software customization
- Full equipment color customization

KEY FEATURES:

- Design and components based on CrossPark automatic pay station with same level of security and technology
- Fully customizable front-end graphical user interface
- Fully customizable ticket printer including third-party equipment
- Selectable dimensions and material of the tickets
- TCP/IP connectivity and remote access
